

## CERBIOS and its young apprentices

The management of Cerbios-Pharma SA congratulates his four apprentices for successfully concluding the three-year study.

Cerbios-Pharma SA is investing in the training of young people since long time and is recognized in Southern Switzerland for the high theoretical and practical working quality of the apprentices formed.

In the past, the majority of apprentices that were formed by our company were hired at the end of the apprenticeship and kept working with us. These days things are changing, in fact, they often decide to continue studying.

The high degree of success reflects the great effort of the trainers that, on top of working on the daily activities, put a lot of personal engagement in order to support their apprentices.

On the picture from left to right in the first row: the apprentices Tobia Olivieri (R&D chemical laboratory), Ivan Laffranchini (R&D biological laboratory), Marc-Olivier Bertoz ( QC chemical laboratory) and Swen Burkard (warehouse).

In the second row: Christian Suà (CFO), Achille Arini (Trainer R&D Biological Division), Moreno Morosoli (Trainer R&D chemical division), Gabriel Haering (CEO), Giulio Tajana (Trainer QC chemical division), Marc Medawar (Trainer warehouse).

Actually Cerbios-Pharma SA has in staff six apprentices in six different departments.
